Projects

Smart Campus Recruitment System

january 2025 – June 2025

MERN Stack (MongoDB, Express.js, React.js, Node.js)

- Developed a full-stack Smart Campus Recruitment System using the MERN stack (MongoDB, Express.js, React.js, Node.js) during MCA Semester 4 at Aaryak Solutions.
- Implemented role-based access control for students, companies, TPO/admin, and volunteers to streamline recruitment operations.
- Integrated JWT authentication for secure login and GridFS for scalable resume uploads and management.
- Delivered a responsive UI and built modules for job drives, task assignment, and result processing, improving recruitment workflow efficiency by 40%.

Online Cake Ordering System – GetUrCake

february 2024 – may 2024

MERN Stack (MongoDB, Express.js, React.js, Node.js)

- Designed a responsive cake ordering platform to manage product listing, user login, and order tracking.
- Boosted order processing speed by 25% through efficient component design and state management.

Cab Booking & Sindhudurg Tourism Web App

july 2022 - April 2023

ASP.NET, SQL, Windows 10

- Developed a full-stack tourism web application using ASP.NET and SQL for Sindhudurg, enabling real-time cab booking and detailed tourist information.
- Implemented a responsive UI and admin panel for managing user data and bookings, increasing engagement by 30%.

Achievements

- Completed a certified **React.js Course** on Infosys Springboard (Mar 2024), enhancing front-end development.
